

How to treat Cancer?

Evidence searched on 2026-10-07 (PubMed, ClinicalTrials.gov, FDA drug labels, web)

Top treatment drugs (from FDA drug labels):

Drug	Category	FDA-labelled indication for this condition (label wording)	Source
Avobenzone, Homosalate, Octisalate, Octocrylene	FDA-approved for the labelled indication	"uses helps prevent sunburn if used as directed with other sun protection measures (see Directions), decreases the risk of skin cancer and early skin aging caused by the sun"	[DailyMed label](https://dailymed.nlm.nih.gov/dailymed/drugInfo.cfm?setid=00ee1dc6-b4f3-4ae3-890c-8e37f6d3fe3a)
Titanium Dioxide, Zinc Oxide	FDA-approved for the labelled indication	"Uses helps prevent sunburn if used as directed with other sun protection measures (see Directions), decreases the risk of skin cancer and early skin aging caused by the sun"	[DailyMed label](https://dailymed.nlm.nih.gov/dailymed/drugInfo.cfm?setid=003123d2-9675-fdd2-e063-6294a90a0130)
Prednisone	FDA-approved for the labelled indication	"where applicable; in infancy mineralocorticoid supplementation is of particular importance) Congenital adrenal hyperplasia Hypercalcemia associated with cancer Nonsuppurative thyroiditis 2. Rheumatic ..."	[DailyMed label](https://dailymed.nlm.nih.gov/dailymed/drugInfo.cfm?setid=0060b86b-0b79-4c54-a7be-97683a933a05)
Octisalate, Titanium Dioxide	FDA-approved for the labelled indication	"Uses Helps prevent sunburn. If used as directed with other sun protection measures (), decreases the risk of skin cancer and early skin aging caused by the sun. see Directions"	[DailyMed label](https://dailymed.nlm.nih.gov/dailymed/drugInfo.cfm?setid=0018573d-922b-4642-9513-63481e9131d5)

Bottom line Cancer treatment involves **multidisciplinary approaches**, including **systemic therapies (e.g., targeted drugs, immunotherapies)**, **supportive interventions (e.g., behavioral speech therapy, mHealth symptom management)**, and **perioperative management (e.g., graphene-based materials, lymphedema therapies)**. Evidence supports behavioral speech therapy for postoperative pain and function in lung cancer (Zhang et al., *Supportive Care Cancer*, 2026 [PMID 42611082]) and mHealth apps for symptom management in advanced cancer (Wells-Di et al., *JMIR Cancer*, 2026 [PMID 42748353]).

Most important recent finding Date: 2026-10-01 | **Study type:** Retrospective cohort study **Key result:** Sizi Powder external application combined with TDP therapy significantly reduced upper limb lymphedema swelling, alleviated symptom burden, and improved functional outcomes after breast cancer surgery (Zeng et al., *Medicine*, 2026 [PMID 42826302]).

Immediate context

Deep research

Latest findings

2027

- **Emerging:** Mucosal impedance measurements (MI-H and MI-L) distinguish early gastric cancer stages (pT1a vs. pT1b) and ulceration status (pUL0 vs. pUL1) (Miyashiro et al., *DEN open*, 2027 [PMID 42781318]).

2026

- **Evidence-supported but limited:** Psychosocial interventions improve neurocognitive outcomes in children/adolescents with cancer (SMD: 0.51 [95% CI: 0.32, 0.69]) (Paterson et al., Supportive care in cancer, 2026 [PMID 42766188]).
- **Evidence-supported but limited:** Behavioral speech therapy (BST) reduces postoperative pain and improves physical function in lung cancer patients (Zhang et al., Supportive care in cancer, 2026 [PMID 42611082]).
- **Emerging:** Home-based exercise (exCR) improves cardiorespiratory fitness (CRF) and health-related quality of life (HRQoL) in cancer patients (Winnige et al., Annals of medicine, 2026 [PMID 42811812]).
- **Experimental or preliminary:** Sizi Powder + TDP therapy may reduce swelling and improve function in upper limb lymphedema post-breast cancer surgery (Zeng et al., Medicine, 2026 [PMID 42826302]).

2026 (Drugs)

- **Evidence-supported but limited:** Trastuzumab deruxtecan + pertuzumab extends progression-free survival (PFS) in HER2-positive metastatic breast cancer (median PFS: 40.7 vs. 26.9 months) (Tolaney et al., NEJM, 2026 [PMID 41160818]).

Current evidence

Non-drug treatments

- **Evidence-supported but limited:** Psychosocial interventions (e.g., cognitive therapies) improve neurocognitive outcomes in pediatric/adolescent cancer patients (Paterson et al., 2026 [PMID 42766188]).
- **Evidence-supported but limited:**
 - Behavioral speech therapy (BST) reduces postoperative pain and enhances physical function in lung cancer patients (Zhang et al., 2026 [PMID 42611082]).
 - Home-based exercise (exCR) modestly improves CRF and HRQoL (Winnige et al., 2026 [PMID 42811812]).
- **Emerging:**
 - Mucosal impedance (MI-H/MI-L) may aid staging/ulceration assessment in early gastric cancer (Miyashiro et al., 2027 [PMID 42781318]).
 - Sizi Powder + TDP therapy shows promise for lymphedema post-breast cancer (Zeng et al., 2026 [PMID 42826302]).

Drugs Evidence-supported but limited

- **Trastuzumab deruxtecan + pertuzumab:** PFS benefit in HER2+ metastatic breast cancer (Tolaney et al., 2026 [PMID 41160818]).
- **Abemaciclib + fulvestrant:** PFS improvement in advanced breast cancer post-CDK4/6 inhibitor (Kalinsky et al., 2025 [PMID 39693591]).
- **Emerging:** Graphene-based materials explored for perioperative cancer management (Bai et al., 2026 [PMID 42829697]).

Key studies

1. **Paterson et al. (2026)**, Meta-Analysis: Psychosocial interventions improve neurocognitive outcomes in children/adolescents with cancer (SMD: 0.51 [95% CI: 0.32, 0.69]) (PMID 42766188).
2. **Zhang et al. (2026)**, Randomized Controlled Trial: Behavioral speech therapy reduces postoperative pain and improves physical function in lung cancer patients (MD: -0.63 to -0.88) (PMID 42611082).
3. **Tolaney et al. (2026)**, Clinical Trial (Phase III): Trastuzumab deruxtecan + pertuzumab extends PFS in HER2+ metastatic breast cancer (median PFS: 40.7 vs. 26.9 months) (PMID 41160818).

Treatment Drug Landscape

Regulatory status (official FDA drug labels)

Drug (generic / brand)	Category	Approved indication (FDA label wording)	Dose / route	Approval status / date	Source
Zinc Oxide (Attitude Diaper Cream Zinc Unscented)	FDA label found; its indication does not mention this condition	"Helps prevent diaper rash. Protects chafed irritated skin due to diaper rash. Helps protect from wetness that causes diaper rash. Temporarily protects and helps relieve minor skin irritation due to diaper rash. Helps treat/heal diaper rash."	Not retrieved (see FDA label)	FDA label effective 2024-10-02; original approval date not retrieved	[DailyMed label](https://dailymed.nlm.nih.gov/dailymed/drugInfo.cfm?setid=00283894-ddc6-0faa-e063-6394a90ae47c)
Avobenzone, Homosalate, Octisalate, Octocrylene (sunscreen)	FDA-approved for the labelled indication	"uses helps prevent sunburn if used as directed with other sun protection measures (see Directions), decreases the risk of skin cancer and early skin aging caused by the sun"	Not retrieved (see FDA label)	FDA label effective 2026-03-02; original approval date not retrieved	[DailyMed label](https://dailymed.nlm.nih.gov/dailymed/drugInfo.cfm?setid=00ee1dc6-b4f3-4ae3-890c-8e37f6d3fe3a)
Titanium Dioxide, Zinc Oxide (Neutrogena Mineral Invisible Daily Defense Face Sunscreen Broad Spectrum SPF 30)	FDA-approved for the labelled indication	"Uses helps prevent sunburn if used as directed with other sun protection measures (see Directions), decreases the risk of skin cancer and early skin aging caused by the sun"	Not retrieved (see FDA label)	FDA label effective 2025-07-28; original approval date not retrieved	[DailyMed label](https://dailymed.nlm.nih.gov/dailymed/drugInfo.cfm?setid=003123d2-9675-fdd2-e063-6294a90a0130)
Prednisone	FDA-approved for the labelled indication	"where applicable; in infancy mineralocorticoid supplementation is of particular importance) Congenital adrenal hyperplasia Hypercalcemia associated with cancer Nonsuppurative thyroiditis 2. Rheumatic Disorders As adjunctive therapy for ..."	Not retrieved (see FDA label)	FDA label effective 2023-08-31; original approval date not retrieved	[DailyMed label](https://dailymed.nlm.nih.gov/dailymed/drugInfo.cfm?setid=0060b86b-0b79-4c54-a7be-97683a933a05)
Octisalate, Titanium Dioxide (FOREVER SKIN GLOW 24h wear radiant foundation Perfection and hydration Concentrated floral skincare with sunscreen Broad spectrum SPF 15 00)	FDA-approved for the labelled indication	"Uses Helps prevent sunburn. If used as directed with other sun protection measures (), decreases the risk of skin cancer and early skin aging caused by the sun. see Directions"	Not retrieved (see FDA label)	FDA label effective 2024-08-06; original approval date not retrieved	[DailyMed label](https://dailymed.nlm.nih.gov/dailymed/drugInfo.cfm?setid=0018573d-922b-4642-9513-63481e9131d5)

Drug (generic / brand)	Category	Approved indication (FDA label wording)	Dose / route	Approval status / date	Source
Ondansetron	FDA-approved for the labelled indication	"1 INDICATIONS AND USAGE Ondansetron is indicated for the prevention of nausea and vomiting associated with: • highly emetogenic cancer chemotherapy, including cisplatin greater than or equal to 50 mg/m ² • initial and repeat courses of ..."	Not retrieved (see FDA label)	FDA label effective 2026-07-29; original approval date not retrieved	[DailyMed label](https://dailymed.nlm.nih.gov/dailymed/drugInfo.cfm?setid=02ddd5f5-76d3-4f1c-9af3-d39e05a19c29)
Allopurinol	FDA-approved for the labelled indication	"uric acid lithiasis, and/or nephropathy) The management of adult and pediatric patients with leukemia, lymphoma and solid tumor malignancies who are receiving cancer therapy which causes elevations of serum and urinary uric acid levels The ..."	Not retrieved (see FDA label)	FDA label effective 2024-07-08; original approval date not retrieved	[DailyMed label](https://dailymed.nlm.nih.gov/dailymed/drugInfo.cfm?setid=005048dd-844f-468c-bf56-1a09727e3477)

Approval applies only to the labelled indication quoted above; it is not an approval for other symptoms or features of the condition. Dose, route and frequency are not extracted here: see the linked FDA label.

Other agents named in the retrieved evidence (not in the FDA label records)

None retrieved.

Safety alerts: No safety alerts retrieved for substances named in the retrieved evidence.

Clinical trials (registry data)

Treatment and intervention trials

Trial	Intervention	Phase	Registry status (last update)	Reading
NCT07775287	Petosemtamab; Cetuximab	PHASE3	RECRUITING (2026-10-06)	Under investigation; results not yet available; effectiveness cannot be inferred.
NCT03896269	Liposome-encapsulated Daunorubicin-Cytarabine	PHASE1	RECRUITING (2026-10-06)	Under investigation; results not yet available; effectiveness cannot be inferred. Specific syndrome record; do not generalise to the whole condition.
NCT06841354	Sacituzumab tirumotecan; Pembrolizumab	PHASE3	RECRUITING (2026-10-06)	Under investigation; results not yet available; effectiveness cannot be inferred.
NCT06216301	NovoTTF-200T; Pembrolizumab	PHASE3	RECRUITING (2026-10-06)	Under investigation; results not yet available; effectiveness cannot be inferred.
NCT03328078	Emavusertib; Ibrutinib	PHASE1, PHASE2	RECRUITING (2026-10-06)	Under investigation; results not yet available; effectiveness cannot be inferred.
NCT05922904	Brentuximab vedotin; Doxorubicin Hydrochloride	PHASE2	ACTIVE_NOT_RECRUITING (2026-10-06)	Under investigation; results not yet available; effectiveness cannot be inferred.

Other registry records (assessment, characterisation or peripheral research; not treatment trials)

Trial	Intervention	Phase	Registry status (last update)	Reading
NCT07237438	total intravenous anaesthesia; sevoflurane anaesthesia	NA	COMPLETED (2026-10-06)	Completed; results not posted/retrieved.
NCT04978584	Acalabrutinib; Cyclophosphamide	PHASE2	ACTIVE_NOT_RECRUITING (2026-10-06)	Under investigation; results not yet available; effectiveness cannot be inferred.
NCT06874114	An Observational Study to Learn More About Treatment Patterns and Factors Determining the ...	NA	COMPLETED (2026-10-06)	Completed; results not posted/retrieved.

Registry status shows that research is being conducted, not that a treatment works. Registry status is separate from published results.

Established care

Only guideline pages retrieved from recognised organisations are shown, with a short verbatim excerpt. Nothing in this section is model-written. A topic without a retrieved guideline is not evidence that none exists.

Topic	Guideline	Organisation	Year	Excerpt
All topics	Guideline search unavailable (the source failed); this does not mean no guideline exists			

Conflicting or negative evidence

None retrieved.

What remains under investigation

- **Efficacy:** Head-to-head comparisons of psychosocial interventions vs. standard care for long-term outcomes.
- **Effectiveness:** Real-world feasibility of graphene-based materials in perioperative cancer care (Bai et al., 2026 [PMID 42829697]).
- **Feasibility:** Long-term safety and adherence of home-based exercise (exCR) in diverse cancer populations (Winnige et al., 2026 [PMID 42811812]).
- **Association:** Exploratory mucosal impedance thresholds for gastric cancer staging (Miyashiro et al., 2027 [PMID 42781318]) require validation.

Ongoing research:

- **NCT07775287:** Phase 3 trial of petosemtamab + chemotherapy vs. cetuximab/bevacizumab in colorectal cancer (recruiting).

Evidence limitations

- Findings are drawn from abstracts and web pages, not full texts; study quality was not appraised from the full papers.
- Doses and approval dates appear only where a retrieved source states them; otherwise they are marked 'Not retrieved'.
- PMID 42824459 carries a journal issue date of 2027 (later than today); treat its date as an advance-publication date. *(indirect evidence: different or related population)*

- PMID 42781370 carries a journal issue date of 2027 (later than today); treat its date as an advance-publication date. (*indirect evidence: different or related population*)
- PMID 42781356 carries a journal issue date of 2027 (later than today); treat its date as an advance-publication date. (*indirect evidence: different or related population*)
- PMID 42781318 carries a journal issue date of 2027 (later than today); treat its date as an advance-publication date.
- PMID 42756095 carries a journal issue date of 2027 (later than today); treat its date as an advance-publication date. (*indirect evidence: different or related population*)
- PMID 42732378 carries a journal issue date of 2027 (later than today); treat its date as an advance-publication date. (*indirect evidence: different or related population*)
- PMID 42732135 carries a journal issue date of 2027 (later than today); treat its date as an advance-publication date. (*indirect evidence: different or related population*)
- PMID 42729693 carries a journal issue date of 2027 (later than today); treat its date as an advance-publication date. (*indirect evidence: different or related population*)
- 12 retrieved record(s) were excluded because they were not about the question's subject.
- Source `pubmed\_nondrug`: retrieval partial (timed out after 25s (partial)); evidence status: unavailable. The absence of evidence cannot be concluded from this source.
- Source `guidelines\_deep`: retrieval partial (timed out after 25s (partial)); evidence status: unavailable. The absence of evidence cannot be concluded from this source.
